SUPPORTED PLATFORM	Xbox Series X | S / Xbox One / Switch / Win 10/11

ATTACH THE ARMORX

1. Remove the battery compartment cover off the Controller and attach the ARMORX to the battery compartment.
2. Plug the USB-C flexible cable of ARMORX into the USB port of the Xbox Series Controller.

NOTICE: For best performance, please fully charge the ARMORX before using it for the first time. It takes about 2.5 hours to fully charge a depleted battery.

CONNECT TO THE CONSOLE

The Xbox Series controller with ARMORX can support Xbox/ PC/ Switch originally. Hold the power button to turn on the ARMORX and plug the USB wireless adapter into the console's USB port. The ARMORX will detect the platform automatically.

★ LED1 slowly flashes mean that the ARMORX is connecting with the adapter. And the fast flashes mean that the ARMORX is paring with the adapter. After the connection is successful the LED1 will become always on (The adapter indicator is same).

★ After the connection is successful the LED1 and adapter indicator will become always on and switch to the corresponding platform color.

★ LED2 flashes mean the connection between ARMORX and controller is unsuccessful and always on means connection success.

★ Connect with Switch console need to set: System Settings > Controllers and Sensors > Pro Controller Wired Communication On.

WIRED CONNECTION

1. After attaching the ARMORX to the Xbox Series controller, hold the power button to turn it on.
2. Connect the Type-C port of ARMORX to the console with a Type-C cable.
3. Check the indicator lights of the ARMORX until both indicators are always on, which means the wired connection is successful.

Note: 3.5mm audio jack is only available under wired connection, wireless connection does not support 3.5mm audio.

RE-PAIR

ARMORX is already paired with the adapter in the factory. The only situation you need to pair it with is that the connection of ARMORX and adapter is failed. The steps of re-pair:

1. After the ARMORX is on, hold the 🎮+FN until the LED1 fast flashes, the ARMORX enters pairing mode.
2. Plug the adapter into the console and hold the pair button on the adapter until the indicator fast flashes, the adapter enters the pairing mode.
3. When the LED1 and adapter indicator fast flashing means it is pairing. Please wait for it until the LED1 and adapter indicator become always on, the re-pair is successful.

HAIR TRIGGER

After opening the hair trigger you can do the next operation without waiting for the trigger restoration. Press the trigger at any position to activate it.

1. Hold 🎮+ Left trigger(LT) the LED2 will flash in cyan twice means hair trigger open success.
2. Hold 🎮+ Right trigger(RT) the LED2 will flash in cyan twice means hair trigger open success.
★ The LED2 will flashed in cyan when you press the trigger with hair trigger function.
★ Double click the hair trigger button will cancel all hair trigger.

ADJUSTMENT OF RUMBLE MOTOR

1. Press **FN** + ← to change the vibration intensity of trigger motor. 4 gears vibration intensity can be changed cyclically: strong, medium, weak, off.
2. Press **FN** + → to change the vibration intensity of handle motor. 4 gears vibration intensity can be changed cyclically: strong, medium, weak, off.

ON-BOARD PROFILE

ARMORX has 3 on-board profiles can be cycle switched by click the 🔶 .The color of LED1 on the left side shows different profiles.
1. Orange is the first profile.
2. Green is the second profile.
3. Blue is the third profile.

BATTERY

The ARMORX has 1300mAh to satisfy 10 hours using. The biggest factor affecting battery life is the vibration intensity of motor. The high-frequency vibration will greatly reduce battery life.
The charging power is 5V/1A, and it will take 2 hours to fully charge.
1. Low battery: When the battery is too low, the controller will vibrate 3 times and the LED1 will flash quickly in red. It will cycle every 5 minutes.
2. Charging: When the ARMORX is charging LED1 will be always on in red. And it will be always on in green after fully charged.
