Name of each part

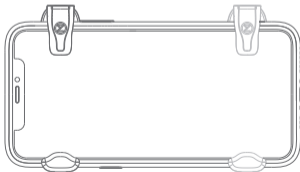

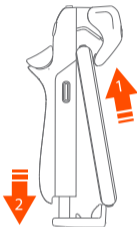

- | | |
|------------------------------------|--------------------------------|
| A Trigger button | E Mode indicator |
| B Single Shot button | F USB charging terminal |
| C Performance-X mode switch | |
| D FN button | G USB cable |

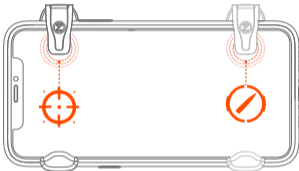

▲ Please note: The phone case must be removed before use. Turn off the phone screen first when installing and then turn on the trigger before playing

Installation & Use

- a. Install the JET gaming trigger into the left / right side along the phone screen, and then pull the lever to lower the other side to fit the device.

b. Enter the your game's custom settings page, move the button you want to set to the corresponding position, remove the overlapping buttons, make sure that one position corresponds to only one button, and save the settings.

TURBO Function

By pressing the FN button, you can switch between the TURBO functions in 3 modes, and when switching, the color of the indicator changes to indicate the current mode status.

Indicator Color Mode Description.

● Green	Single Shot on
● Yellow	Turbo on
● Red	Custom Turbo on

Customized TURBO Function

- Press and hold the FN button for 3 seconds and the indicator will flash red to enter the customized TURBO record mode.
- Record fire frequency you like, and press the FN button again, when the indicator goes out, the record is complete.
- You can press the FN button to enter the customized TURBO mode and press the trigger button to use the recorded TURBO function.

Vibration Function

Long press the FN button, and then press the trigger button at the same time to turn on/off the vibration function of the motor.

Performance-X Mode

When adjusting the Performance-X mode switch, the TURBO frequency in this mode can be adjusted to 2x / 3x.

Battery Description

Charging time: 1.5h

Charging capacity: 75mAh

Power supply: 5V-1A

When the battery power is 15% and above (full charge state), the power indicator is steady green.

When the battery power is less than 15%, the power indicator flashes red quickly.

When the battery power is less than 5%, the mobile game button will enter the low battery protection and automatically shut down.

While charging, the power indicator shows red light flashing slowly.

Screen Off Method Calibration

If the key touch is invalid during use, turn off the phone screen and then turn it on again to automatically complete the calibration.
